

MAERSK LOGISTICS

To Whom It May Concern:

Atilla worked with me in my capacity as European IT Manager at Maersk Logistics Solutions. Atilla was based at the MLS location in St.Vulbas, France, but also assisted in the me at the other French MLS location in Dunkerque. Although Atilla reported to the location General Manager in St.Vulbas, during the implementation phase of the EXE Exceed 4000 Warehouse Management System (WMS) (which I managed), he spent the majority of his time assisting me in key IT implementation activities. In my time at Maersk between September 2000 and July 2001 he performed a number of key tasks dilligently.

These included:

Management of on-site contractors, installing, configuring and testing hardware and software.

Working with myself, and the remainder of the mutli-national and multi-lingual technology implementation team to accomplish project tasks and to escalate and resolve issues.

Being trained in the UK as an EXE superuser, and with this skill, assisting in the testing of the application during the implementation period, the training of the local operational team in the use of the WMS, and supporting it during the go-live period and subsequent day-to-day operation with the software

Configuring the EXE application to support the phased take-on of the Lego contract

Liasing with the Maersk France IT department to ensure the provision of satisfactory local IT equipment (PCs, network connections, analogue phone lines)

Configuring and optimising the use of other operational software associated with EXE – for example the Loftware label production application, used to produce bar-coded carton labels.

I would have no hesitation in recommending Atilla.
